EXPERIENCE

SpruceID

Principal Software Engineer

Senior Software Engineer

Software Engineer

(Remote) London, United Kingdom

March 2023 – Present

April 2022 – March 2023

September 2020 – April 2022

- Joined as the second employee.
- Bootstrapped most projects over the years and adapted as the company shifted focus from open-source web3 work to government professional services.
- Projects highlights:
 - California DMV mobile driver's licenses: co-led a cross-functional team to implement end-to-end mDL issuance and presentation, with successful production deployment after 6 months.
 - Sign-in with Ethereum: wrote an OIDC IdP, as well as libraries in Rust, JS, Python, and Go.
 - Standards implementations: wrote open-source libraries for W3C Verifiable Credential, OID4VC, ISO mDL, as well as tooling such as CLIs and HTTP services, with hundreds of GitHub stars combined.
- Development: worked on most libraries and services; mostly in Rust but also generated bindings for other languages, and worked on web and mobile apps.
- Infrastructure: set up the infrastructure from the ground up, from provisioning to CI/CD and monitoring, achieving 99.99% uptime and SOC2 compliance. Also worked in customers' environments for cloud-prem deployments.
- Management: up to 7 direct reports, provided engineering guidance, translated ambiguous requests from internal stakeholders and customers into action items, interfaced with customers, helped with the product direction, and was part of the leadership team.
- Digital Identity: experience in implementing privacy-focused standards and designing solutions across domains, as well as managing enterprise systems.

Nexmo (Vonage)

Software Development Engineer in Test

London, United Kingdom

November 2018 – October 2020

- Testing: maintenance and optimisation of the test suite, debugging across the whole stack.
- Monitoring: facilitate incident impact measurement, track API usage, alerting, part of the on-call rotation.
- Development: built a rating engine, refactored cluster management, various internal changes in services.
- DevOps: AWS and Docker migration, maintenance of on-demand test environments.

EDUCATION

University of Rennes 1 & ÉNS Rennes

BSc & MSc in Computer Science, research track

Rennes, France

2013 – 2018

Research internships at: KTH (Stockholm, 2018); KAIST (Daejeon, 2017); and IRISA & INRIA (Rennes, 2016).

SKILLS

Languages Rust, Python, Swift, Terraform

Rust Libraries Axum/Tower, RustCrypto, Cryptoki (PKCS#11), uniffi, wasm-bindgen, Leptos, Sea-ORM, PyO3

Application Platforms Linux, Web, iOS, Android

Tools Grafana stack (Prometheus, Mimir, Loki, Tempo), Docker, Helm, FluxCD, GitHub Actions, Karpenter

Orchestrators Kubernetes (EKS with EC2 and Fargate), HashiCorp Nomad, Cloudflare Workers, ECS (Fargate)

Cloud Providers AWS, Cloudflare

Standards JOSE, OAuth2, OIDC, W3C Verifiable Credentials, OID4VC, ISO mDL, Sign-in with Ethereum
